## TIRE CO

### Repairing Tires

Sometimes a problem with your tire can be fixed with a small repair. If this is the case then we at Plains Tire Co are more than happy to repair it. However it is important to remember that we strictly adhere to the **RMA** (Rubber Manufacturers Association) recommended procedures therefore if your tire is beyond repair according to these guidelines for your safety and those of others on the road we would **NOT** be able to issue a repair. Please keep in mind that if it happens to be that your tire does not meet proper RMA repair guidelines then we can set you up with a great deal on a tire or tire set. Regardless of your needs we can meet them with quality service that you can depend upon.
